Charging precautions

1. When connecting to the computer while charging,push the switch to the ON position.
2. Please use the power adapter with a charging current of 1A or less to charge it, otherwise it may damage the unit or Dangerous (this product does not come standard with a power adapter).
3. It is recommended to connect the unit to the computer with a USB cable.
4. After the charge is full, the charging symbol is full and stops beating.

Troubleshooting and troubleshooting

1.Suddenly unable to record

Please back up the important files first, and format them on the machine. If they are formatted, they can be used normally. Please clean up the computer in time. This is a computer virus infected with MP3, which makes MP3 unable to use. It may take a long time. The machine is damaged and cannot be repaired.

2.The display does not respond or is always lit in an abnormal state

Please back up important files first, then restore the factory settings. After connecting to the computer, click on My Computer, find the mobile drive letter, right click the mouse, select Format, and then select Quick Format. This will allow you to complete the factory reset and most of the faults can be eliminated.

3.No response after connecting to the computer via the data cable

First check if the plug is in place. If the computer still does not respond, try to switch to a different computer connection. Some computers cannot be recognized because of the lack of a driver. If you still can't identify it after you try it, you can contact after-sales upgrade or after-sales service.
