Operating Instructions

Thank you For Your Purchase. This camera is a high quality 1080P wifi live streaming surveillance camera.

Please follow the steps in the instructions to set up your camera correctly.

1. Just Plug unit into outlet to turn unit on.

I. Mode represented by Light Color on side of unit. Red light is power indicator, which is always on when the power is on. Blue light is WIFI indicator.

Specific mode is as follows:

1. WiFi set up Mode: Blue light flashes slowly
2. Configuration of WiFi Mode completed: Blue light is always on

If you are not clear what mode it is, reset the camera and switch to point-to-point mode.

Note: This reset works only when the blue light is always on or flashes slowly. Press the Reset key for about 5 seconds until the indicators all go out, and let go until the camera starts (about 30 seconds).

II. Download APP software

(Figure 1)

(Figure 2)

Method 1. Scan the QR code (Figure 1), and enter the download page (Figure 2). Choose to download the software according to the system of the mobile phone. Download and install the computer client through the download address http://lookcam.ffvv.xyz:8800/lookcam_download.html

Method 2. For Android, search for APP software called LOOKCAM on Google Play, and download and install it.

For Apple, search for APP software called LOOKCAM in App Store, and download and install it.

Note: If you scan with WeChat, when (Figure 2) appears, click the browser in sharing in the upper right corner to open and download the software.

After downloading and installing, the following icon appears on the mobile phone

III. Point-to-point connection of mobile phone to camera Enter the mobile phone WI-FI settings; find the WiFi account (UID number) and connect. As shown in the figure
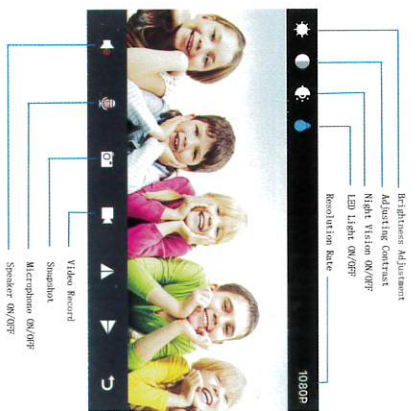

Settings   WLAN

WLAN
