Frequently Question & Answers

Q1: What can i do if the camera offline, shut-down or it cannot working?

A: Please reboot the device to factory settings, then connect the hot-spot signal and do the Wi-Fi configuration again.

Q2: What kind of micro SD card is required for recording?

A: The camera supports 8G-128GB micro SD card. Please use high speed class 10 FAT formatted memory card.

Q3:Why can't use my micro SD Card for recording?

A:You should format the micro SD through the App before using. If SD card is not recognized, just remove the card and re-insert it.

Q4:Why can't the camera go online?

① No power connect
② Check if your router is working properly or not.
③ Weak WiFi signal
④ Wrong password while WiFi setting.

Q5:Why a camera cannot connect a Bluetooth?

A: The battery is too low. It is a suggestion that uses the Bluetooth function while charging all the time.

Q6: Why is remote monitoring not smooth ?

A: You should choose a suitable resolution to watch according to your internet speed.

Q7:Why I can't save to my SD card ?

1. Please make sure you have turn-on the SD card recording function in App, and the SD card must be formatted at the first time to use it.

2. If be inserted a micro SD card, please make sure a device is off before.

Q8: How to take off a TF sd card?

A: Please press a sd card with your finger to remove it.

Q9: If i forgot my password ?

A: Press the reboot button for 8-10s to restore the device to factory setting, then you have to re-connect the wifi and can set the new passwords.

Reminder:

The initial password for the camera is **123456.** Please change your own passwords to ensure the security of your camera.
